

Swarm Aqua® has been installed in:

Stafford

Swarm Aqua® was selected by the contractor as the drainage channel of choice for this timber merchant yard in Stafford.

With regular deliveries on large goods vehicles, Swarm Aqua® was chosen not only for its aesthetic finish, but also for its heavy loading capabilities. Catering for all loadings up to F900kN, Swarm Aqua® is always up to the task.

Having used Swarm Aqua® before, the contractor was pleased as always with the speed and simplicity of the installation.

Swarm Aqua® has male and female ends, with a factory fitted connecting collar to make joining channels on site quick and easy.
